

## LASER POINTER

The buttons on the T'nB remote control features a clear and intuitive way to facilitate the presentations.

Thanks to its 2.4GHz wireless technology, it leaves you free to move around and control your Microsoft PowerPoint  $^{\text{TM}}$  or Apple Keynote  $^{\text{TM}}$  remotely, without cable or wire.

The integrated laser pointer allows the presenter to highlight important content.

Wireless technology 2.4GHz RF operates at distances up to 10 m, providing flexibility for presentations in large conference rooms or classrooms. For convenience, the USB mini-receiver stores inside the remote control when not in use.

In an economy worries of the battery, the laser starts automatiquemet standby.

Elegant and functional, the T'nB presentation laser is your essential tool to deliver presentations without problem.
