

# Bluetooth Audio Splitter with Two 3.5mm Audio Jacks

i111BT

Convert your standard headphones into a wireless pair using this Bluetooth splitter. Enjoy the luxury of controlling your tunes from up to **30ft away** from your smart phone or audio device. It also works with the iPhone 7 so you can listen to music with your friend even without a standard headphone jack. Additionally, a built-in microphone allows you to conveniently answer incoming calls without having to grab for your phone.

# INTIMATE LISTENING WITH PERSONAL VOLUME CONTROL

Share Your Music but Keep Your Preferred Volume

There's no better way to share your listening experience than with the freedom of wireless Bluetooth technology. Featuring dual volume control adjusters, both you and your friend can each listen to the same music at your desired levels.

ENHANCE

# YOUR OLD HEADPHONES

## New Way to Listen with Old Headphones

Transform your regular earphones into Bluetooth earphones. Plug your 3.5 mm earphones or headphones into this splitter and watch them instantly turn into a wireless headset. With impressive Bluetooth strength, this splitter allows you to stream music up to 30 ft away from your smart phone or audio device. It also works with the iPhone 7 and other smartphones without standard 3.5mm jack.

# ANALOG SPEAKER

# CAR STEREO

Wirelessly Control Your Analog Home Audio & Car Speaker

Thought your home Hi-Fi speaker does not support Bluetooth? Think again. With this Bluetooth converter you can play your music wirelessly through your analog home audio speaker or car stereo. Plug in 3.5 mm cable to Aux-in port on your speaker or car without Bluetooth. Finally you can give your old gadgets a much needed update.

# HANDS-FREE VOICE CONTROLLED

Answer Calls, Talk to Your Phone, Let Your Hands Free

Built in microphone allows you to conveniently answer incoming calls without having to grab for your phone. You can also talk to your phone through major voice command software like Apple's Siri and Google Now.
