What Is Power Delivery (PD)?

FAST

Charge your phone super fast. For example, a 20W PD charges an iPhone 12 up to 4X faster than a standard 5W charger. It supports Fast Charge for Apple, Samsung and Google.

SMART

Smart circuitry constantly communicates with the connected device to deliver the right amount of power throughout the charge cycle. It's also backwards compatible so it will charge older phones.

SAFE

USB-PD chargers and cables are designed with the latest technology to safely provide the higher power levels required by today's power hungry devices.

Smartphone Battery % after 50 Minutes of Charging*
*Actual charge speed depends on your device

POWERSHOCK™ PD

Regular Chargers

USB Type-C

USB-C is the Key

USB Power Delivery™ is a universal and international standard developed by the USB Implementers Forum. It has been adopted by most global consumer technology companies. Its many useful features include:

- Fast Charging
- Smart Charging
- Fast Data Transfer
- Charges many devices from phones to tablets and laptops, for example a 60W USB-C PD will safely charge your phone, tablet and laptop. One charger and cable does it all.
- Bi-directional charging and data transfer (only between two Type-C devices). So you can charge one phone from another.

*Not all USB-C chargers and cables are Power Delivery. Read the description before you buy.

What Do You Need?

COMPATIBLE DEVICES

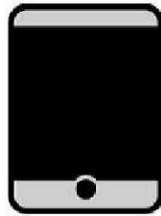

iPhone 8 & Newer

Phones

SAMSUNG

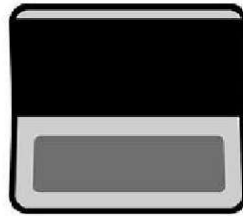

Galaxy S8 & Newer

Tablets

Pixel 2 & Newer

Laptops

USB-C ACCESSORIES

USB-C Cable

PD Charger

The fact that there was **NO CHARGER INCLUDED WITH YOUR IPHONE 12** gives you the perfect excuse to upgrade your charging experience with a 20W USB-C PD Charger. Paired with one of our PD-compatible USB-C to Lightning cables, you'll experience your fastest phone charging experience ever. USB-C PD chargers and cables are completely safe to use with older or non-PD devices and will charge them at their safest and fastest speed.

CABLE

ExtendIt

USB-C to USB-C Extension Cable

Sometimes the cable that comes “in the box” with your devices just isn’t quite long enough. Before you discard it, plug in this USB-C extension cable and effortlessly add another 3 or 6 ft. of reach to your charge and sync capability.

- Perfect for adding 3 or 6 ft. to the reach of your Apple MagSafe® charging puck so that you can easily use your iPhone® 12 (and later) while it charges.
- Works with Apple’s USB-C to Lightning® cables for iPads and MacBooks.
- Add 3 or 6 ft. to any USB-C cable, so you’re ready for any charging or syncing situation.
- High-Speed charge, sync, and data transfer.
- Delivers fast data and power transfer speeds.
- **Works With All USB Devices Including:** Phones | Laptops | Tablets | Headphones | Action Cameras | Portable Gaming Systems | and More
