ELARI NANOPHONE C

ULTRA-COMPACT PHONE+BLUETOOTH COMPANION FOR A SMARTPHONE

HIDE YOUR SMARTPHONE

and use the NanoPhone C for your Digital Detox while staying reachable, make and receive calls through your smartphone without dangerous radio emission, entertain friends with Magic Voice function through the second SIM card, record lectures and conversations to a microSD card, listen to MP3 music and FM radio.

Pair Nano C with your smartphone, then hide your smartphone in your bag or pocket and use the Nano C to make and receive calls via Bluetooth with less risk to your health, as the BT module emits much lower emission than the smartphone antenna. Or copy up to 1000 contacts from your smartphone to Nano C with one click, put in your SIM card, and leave your smartphone at home for Digital Detox away from the Internet, messengers, or social networks, while staying reachable by phone or text. You can also turn on Magic Voice function and prank-call your friends with a funny sounding voice. Another use case - install an additional SIM card into Nano C, BT-pair it with your smartphone, and use either of the two numbers to make and receive calls with access to both phonebooks.

- Bluetooth sync with smartphones (iOS, Android)
- GSM 850/900/1800/1900 with microSIM for own calls, SMS and Magic Voice function
- Copy up to 1000 contacts from smartphone; slot for microSD up to 32 GB
- MP3 player, FM radio, voice recorder with phone calls recording function
- Headphone jack, microUSB port for charging/data transfer
- Battery life – up to 4 days in standby mode, up to 4 hours of talk time
- Headphones with a microphone and a neck cord included in the set
- Bluetooth call recorder
