**Jenluca - the Factory, has been created based on many years of experience in the telecom industry**

Due to our passion and commitment we decided to invest in opening the first manufacturing plant in Dubai, UAE.

We are the only manufacturing hub in the MENA region to offer a number of product lines with the very best in quality and warranty support at your doorstep. While assembling each cable there is a 3 step diagnostic testing process which offers our Customers a guarantee on quality that they deserve.
