e-CamView Pan/Tilt HD IP Camera

Easy accessible all over the world

DESCRIPTION

The EM6225 e-CamView Pan/Tilt HD IP Camera keeps an close eye on your belongings. The camera overlooks a large area because of its pan/tilt movements. Install the HD IP Camera within only a few simple steps. The HD sensor and IR Cut filter take care of clear images. The infrared leds ensure a clear view at night. Control the EM6225 Pan/Tilt HD IP Camera with the free e-CamView app on your smartphone. Do you want to know exactly what happens at your home? Listen along with the built-in microphone. If the camera detects any movement it will send an alarm notification via email. It is also possible to record the images on a SD card.

Easy to install and controllable with Android/Apple app

Install the EM6225 HD IP Camera within only a few simple steps. First, you need to download the free e-Camview Android/Apple smartphone app. Next, you need to scan the unique camera code and fill out the password. Control the HD IP Camera with the app and record the images. Store the images on your smartphone.

HD sensor and IR Cut filter for clear images

Thanks to the HD sensor and IR Cut filter the images of the EM6225 e-CamView Pan/Tilt HD IP Camera are accurate. Is it too dark near the camera? The infrared leds will switch on automatically. You will have good images both day and night.

Wireless connection to the network

Connect the EM6225 wired or wireless to your network and locate the IP Camera in your home wherever you want. Mount the IP Camera easily to the wall or ceiling with the special mounting bracket.

Overlook a wide range because of its pan/tilt functionality

The EM6225 e-CamView Pan/Tilt HD IP Camera moves to the direction you want by its pan/tilt functionality. In this way you overlook a larger area than a fixed IP Camera. You will keep a close eye on your belongings.

Photo evidence saved in your email or stored on micro SD card

Detects the camera any movement? The e-CamView Pan/Tilt HD IP Camera sends an email with the image to your email address. Determine by yourself how many pictures will be made when movement is detected. You can store the videos also on a micro SD card.

Two-way voice communication with built-in microphone and speaker

Are you curious about the activities in your home? Listen along and speak back via the e-CamView app. The built-in microphone and speaker keep you up-to-date of all activities. Connect an external microphone and speaker for a more powerful sound.
