

Simple but Essential

These simple weather stations display weather forecast, indoor/outdoor temperature and humidity¹. They also feature a radio-controlled clock and an LED backlight for viewing in low light conditions. Ice alert indicates when temperature nears freezing. By using additional wireless sensors, each weather station can support temperature monitoring in up to 5 remote locations.

This user-friendly collection of weather stations comes in a sleek design that will match virtually any room at home or at work.

¹ Specifications may differ depending on the selected model.

Alize Weather Station (Advanced Version) BAR268HG

Product benefits

Easy to Read

- The large screen and number display allow you to check the weather easily from across the room.

All at a Glance

- The unit supports up to 5 channels allowing temperature monitoring in up to 5 remote locations by using additional wireless sensors.
- A special ice alert blinks a warning when outdoor temperatures dip too low, so you're not caught off-guard by dangerously icy conditions.

Simple in Use and Design

- The built-in radio-controlled clock automatically updates itself to give accurate local time readings without any extra effort on your part.
- Sleek and modern design is suitable for home use, office or dorm rooms.

Target audiences

- **Busy city dwellers** who prefer the convenience of 'weather at a glance' to having to waste valuable time turning on the TV or visiting a website
- **Parents** who want to guard against chills and damp around their young ones.
- **Outdoors lovers** who want to be aware of extreme weather long before they set out on a camping trip or hiking expedition
- **People living in places with fast-changing daily microclimates**, i.e. very warm afternoons and very cold nights
