

### 95/165 LUMENS

Powerful Cree Led pushes an impressive 95/165 Lumens, providing good light for most situations

### SMART FUNCTIONS

Instant off from any light mode, and memory function which remembers which setting it was turned off from.

### BATTERY INDICATOR

Battery indicator lets you see when you are running low on power, so your never left in the dark.

### IPX5 CERTIFIED

Splash waterproof so it can be used in rainy or wet conditions.

## INTELLIGENT PERFORMANCE

The new Guide provides strong all round performance, with 95 Lumens of smooth, evenly distributed light output. It provides good illumination for most situations, whilst at the same time has a number of smart features. Instant off and the memory function allows the light to be switched off from any setting, and when powered back on returned to that same setting - especially useful when combined with red light in order to negate loss of night vision. In addition the 180 lumen Guide Pro features a stepless dimmer function to adapt the light level exactly to the users requirement.

Furthermore the Guide is IPX5 rated making it sufficiently waterproof to be used in rainy or wet conditions. Its diminutive stature keeps the weight close to the forehead and reduces perceived weight. Combined with its firm and sturdy hinge, its small stature allows adjustment of the light whilst keeping unwanted vibration during active use down to a minimum. Finally there is the battery indicator, which gives ample warning when the battery is running low.

### OUR BEAUTIFUL PACKAGING

Each and every one of our Lighting products comes beautifully packaged and looks great hanging or standing.

### HELMET CLIPS

Our Helmet Clips can be used in conjunction with all standard head straps.
