

Hercules

If you want the area coverage of a lantern and the directional light of a torch, our Hercules Cree X-lamp is for you. And that's because it has a very unique design feature: with just one turn of its knob, the Hercules converts from a lantern into a 145 lumen hand-torch. All of this comes down to its clever cap. The innovative clear convex lens is designed to regulate directional illumination as a torch. Yet by using the rotatable hanging hook, you can hang the Hercules from its base as a lamp, and the lens provides flawless surround light, with no dark shadows. It offers burn times of up to 25 hours on four AA batteries, so it's very economical to run. And it weighs just 298g including the batteries, making it a great all-rounder for camping, travel, or emergency lighting at home.

Material:	Aluminium/ Rubber
Bulb Type:	1 x XP-E (Q4) Cree white LED
DC-DC	Yes
Regulated:	145 Lumens
Max Output:	High > low > off, hold for flashing, for area
