Nordic outdoor

185 LUMENS

Powerful Cree LED's push up to an impressive 185 Lumens, providing impressive light for any situation.

INSTANT OFF

Instant off from any light mode.

95 GRAMS INCLUDING BATTERIES

Battery indicator lets you see when you are running low on power, so you never left in the dark.

IPX6 CERTIFIED

Heavy rain and splash water resistant so you can go it wont let you down whatever the weather.

IMPRESSIVE POWER

The ranger was developed as a light and versatile headtorch backed up by some impressive specifications. Now with the mk. 2 it has become a small powerhouse. Pushing 185 Lumens our new ranger throws a long beam and allows you to see crystal clear.

Furthermore, we have multiple Rangers to choose from. All the features explained are in addition to those already described.

Our Ranger WL comes with side lights for periphery lighting. This is useful for general activities for example helping runners safely navigate the path ahead and surrounding environment. and also if used exclusively can conserve batteries when required.

We also have a ranger with red side lights - perfect for the hunting/shooting/fishing industry. The red light comes on first, and used in conjunction with the instant off function, the white light never has to be on, and therefore it preserves night vision. Finally it comes in a camo green colour.

Our Ranger RC is our rechargeable model. It comes with white side lights like the ranger wl and has removable rechargeable batteries, therefore if you run out of charge and you are far from a socket you can just use disposables instead.

OUR BEAUTIFUL PACKAGING
Each and every one of our Lighting products comes beautifully packaged and looks great hanging or standing.

HELMET CLIPS
Our Helmet Clips can be used in conjunction with all standard head straps.
