Smart Functions

Pull down diffuser lens

IPX7 certified

Top head strap for increased comfort and support

Cree LED

Top head strap for increased comfort and support

1800 mAh battery pack

Battery indicator

Micro USB for charging

ULTIMATE PERFORMANCE

Our new flagship model, this is the most powerful headtorch we have every produced. At 280 lumens (boost) it will allow you to see far into the distance and every detail of your surroundings. Furthermore we offer both a non rechargeable, and a rechargeable model.

Not only is this the brightest we've ever produced, but the most feature rich also. Firstly it includes smart features - these are an instant off from any mode function, a memory function that allows it to switch on to its most recently used mode, and a stepless dimmer function meaning it can dim smoothly to any brightness.

It includes a battery indicator on the back, and a battery warning light on the front which flashes a red light for three seconds every 5 minutes which can be seen by the wearer so you will never be left without battery.

It is IPX7 Rated so it is waterproof and ready for the most demanding environment. The power button also can be switched on or off from underwater.

It also has a diffuser lens which spreads light more evenly so you get more periphery illumination.

Finally it has a survival whistle built in, in case things don't go quite as planned.

OUR BEAUTIFUL PACKAGING

Each and every one of our Lighting products comes beautifully packaged and looks great hanging or standing.

HELMET CLIPS

Our Helmet Clips can be used in conjunction with all standard head straps.
