CAMP II

WIND UP RECHARGEABLE

The Camp II is a rechargeable lantern than can be charged via USB, or if power is unavailable, by hand via the crank producing up to 10 minutes of light from one minute of cranking. The Camp II can also be compressed to become a 22 lumen torch if a more directional light beam is required. There are four settings: Full light, dimmed light, red LED, SOS flashing. Furthermore there is a ring that illuminates in the dark so it is easy to find. The camp II is made of robust ABS, and is highly water resistant so it is perfect as an emergency light, or for taking with you into the wilderness.
