- 2 X Ultra lightweight wireless headset
- Background noise reducing foam ear tips
- Snap-Fit charging for a secure charge every time

Overview

For those of you that simply want the best, the 5.0 Dual Digital with Speaker covers all of your TV listening needs. With this top of the line system, you get two 5.0 Headsets with their ergonomic and background noise reducing foam ear tips, a Dual Digital Transmitter for a twice as powerful digital audio output, and a wireless 5.0 Speaker to fill your room with crystal clear, voice clarifying audio.

Listen at your own volume level with a wireless 5.0 Headset or share the voice clarified audio with everyone in the room using the wireless 5.0 Speaker. This system is perfect for game day, daily TV shows, or a relaxed movie night. With all of the benefits of the best TV Ears products plus the best voice clarifying TV speaker that exists, TV listening doesn't get any better than it does with the 5.0 Dual Digital with Speaker. Join the family and hear TV like never before.

How it works

The transmitter is placed on a flat surface facing the seating area and is connected to the audio out port on the back of the television, satellite or cable box. The transmitter then sends audio wirelessly to the speaker system and headsets. Volume is controlled independently from the TV on the Speaker.

Technical Data

Transmission Type	Infrared, Mono
Audio Frequency Response	20 - 20,000 Hz
Transmission Frequency	2.3 MHz
Max SPL	125 dB
Headset Dimensions (H x W x D)	8" x 5.4375" x 0.6875"
Digital Connectivity	Dolby, SRS, and PCM product compatibility
Transmitter Dimensions (H x W x D)	1.4" x 4.12" x 3.625"
Speaker Dimensions (H x W x D)	Speaker Dimensions (H x W x D) 4.25" x 11" x 6.5"

Package Contents

- Two Wireless 5.0 Headsets (wireless and rechargeable)
- 5.0 Dual Digital Transmitter (holds and charges 2 headsets)
- Rechargeable battery (comes pre-installed in the headset)
- Optical Digital Audio Cord
- Auxiliary Audio Cord
- Analog Audio Cord
- Power Supply
- Additional headsets can be purchased separately

Voice Clarifying Circuitry®

What makes TV Ears products stand out above all other TV listening systems is a proprietary technology called Voice Clarifying Circuitry®. An advanced microchip in the transmitter captures the audio signal and amplifies the human speech frequencies above the background noise so that spoken words are clearly audible. This basically boosts the sound of the dialog. Unlike lesser analog models that merely make all sounds louder, TV Ears' products amplify voice pitch frequencies above other sounds, so words are easier to discern. The words seem to jump out of the track, making even whispers and accents understandable.
