Fast charging

Being able to quickly charge your phone or tablet can mean the difference between hours of carefree use or running around to find the nearest restaurant or bar for a power outlet. Fast charging is an increasingly popular feature that allows consumers to charge their device in just a fraction of the time it takes the old-fashioned method. But not all products use the same type of fast charging, and not all chargers support the different standards.

Fast charging technologies require a special chip in the charger, device or even cable and fill the battery much faster. Charging a smartphone 50% takes only 15 minutes, depending on the technology.

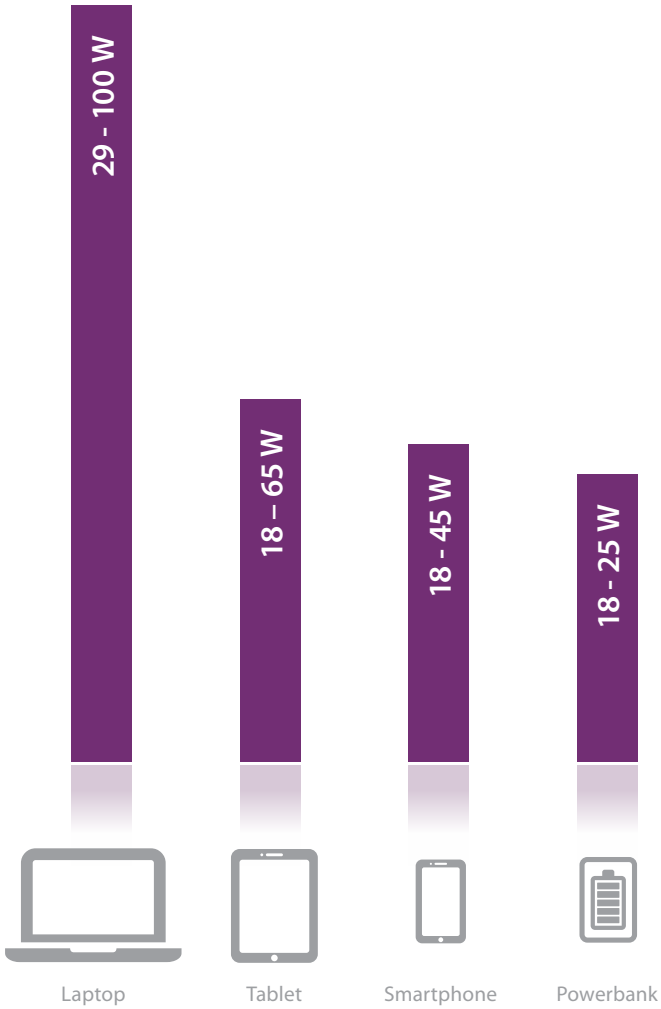

How does fast charging work?

There are two common standards in fast charging. USB-C Power Delivery is a fast charging technology supported by iOS/Apple and Android/Google/Samsung devices. The other standard is Quick Charge from Qualcomm®.

With Quick Charge, the charger and device have an integrated chip.
With Power Delivery, the cable also has one. The chip differs depending on the charging technology. The maximum charging profile is stored on it. It also controls the charging process and makes it safer: if the temperature is too high, for example, it reduces the charging rate. All elements with chip compare their profile and thus together determine the maximum charging power.

USB-C PD can charge even larger devices such as tablets and laptops with up to 100W of power. All you need is a suitable wall charger and USB-C cable.

How much power does a device need?

Charging power is depending on the device

Responsible Packaging

What is GaN Wall Chargers?

Gallium nitride, or GaN, is a material that's starting to be used for semiconductors in chargers. The main thing about GaN when it comes to chargers is that it produces less heat. Less heat means components can be closer together, so a charger can be smaller than ever before - while maintaining all the power capabilities and safety standards.

New in our Nedis assortment are GaN chargers.

New in our assortment are a 65 Watt and a 100 Watt GaN charger. Both chargers bring the convenience of fast, powerful, and safe charging into an ultra-compact design. Ideal for travel, home or office, you'll be able to charge your laptop, tablet, smartphone, or other USB-C devices, with a single powerful charger.
Using innovative GaN technology, the charger provides up to 65W or 100W of power for any compatible device. Built-in protection keeps your devices safe from overcurrent and overvoltage damage. USB-C Power Delivery certification ensures fast and reliable performance with your devices.

Universal Wall Charger

to charge a smartphone or tablet

USB charger with one USB-A port, suitable for devices such as smartphones or tablets. The charger is not only ideal for usage at home or at work, but due to its small size also a perfect travel solution.

No. of Ports	1x USB-A
Output current	2.4 A
Input Voltage	100 - 240 VAC
Max power consumption	12 Watt
Packaging dimensions	140 x 55 x 30 mm

● WCHAU242ABK ○ WCHAU242AWT

Universal Wall Charger

to charge a smartphone or tablet

USB charger with two USB-A ports to charge up to two devices at the same time. The charger is not only ideal for usage at home or at work, but due to its small size also a perfect travel solution.

No. of Ports	2x USB-A
Output current	2x 2.4 A
Input Voltage	100 - 240 VAC
Max power consumption	24 Watt
Packaging dimensions	140 x 55 x 40 mm

● WCHAU484ABK ○ WCHAU484AWT

Universal Wall Charger

to charge 4 device at once

Charge four smartphones or tablets with this Nedis 4-port USB wall charger and charge them simultaneously, without requiring a PC or notebook.

No. of Ports	4x USB-A
Output current	4x 2.4 A
Input Voltage	100 - 240 VAC
Max power consumption	24 Watt
Packaging dimensions	140 x 80 x 40mm

● WCHAU481ABK ○ WCHAU481AWT

Universal Wall Charger

to charge a smartphone or tablet

Charge tablets, smartphones, navigation systems, digital cameras and many other USB devices, without requiring a PC or notebook, with this Nedis universal USB wall charger.

No. of Ports	1x USB-A
Output current	2.4 A
Input Voltage	100 - 240 VAC
Max power consumption	12 Watt
Packaging dimensions	140 x 80 x 50 mm

Universal Wall Charger

20W fast charging with Power Delivery

This Nedis 20 W USB-C™ fast mini charger with power delivery allows you to charge any USB and USB-C™ device. The USB charger allows you to charge devices without a PC or a notebook and is very convenient for use in the office, at home or while travelling

Technology	USB-C Power Delivery
No. of Ports	1x USB-C
Output current	Max 3.0 A
Input Voltage	100 - 240 VAC
Max power consumption	20 Watt
Supported Fast charge Technology	PD3.0 20W
Packaging dimensions	140 x 55 x 40 mm

◯ WCMPD20W100WT

Mini USB-C Charger

30W fast charging with Power Delivery

This Nedis 30 W USB-C™ fast mini charger with power delivery allows you to charge any USB and USB-C™ device. The USB charger allows you to charge devices without a PC or a notebook and is very convenient for use in the office, at home or while travelling

Technology	USB-C Power Delivery
No. of Ports	1x USB-C
Output current	Max 3.0 A
Input Voltage	100 - 240 VAC
Max power consumption	30 Watt
Supported Fast charge Technology	PD3.0 30W
Packaging dimensions	140 x 55 x 40 mm

◯ WCMPD30W100WT

Universal Wall Charger

with power delivery and quick charge

This 45 W USB-C Wall Charger allows you to charge smartphones, tablets, Nintendo Switch and many other USB-C devices without requiring a PC or notebook. It can also power smaller USB-C notebooks and offers you a Smart Charge 3.0 USB-A connection for simultaneous charging.

Technology	USB-C Power Delivery
No. of Ports	1x USB-A, 1x USB-C
Output current	1x 2.4 A, 1x 3.0 A
Input Voltage	100 - 240 VAC
Max power consumption	57 Watt
Supported Fast charge Technology	PD3.0 45W
Packaging dimensions	140 x 80 x 40mm

● WCPD45W100BK

Universal Wall Charger

with power delivery and quick charge

This Nedis wall charger with its advanced Power Delivery technology USB-C PD 3.0 connections allow for faster simultaneous high-speed charging of compatible devices at higher voltages. This charger can also power smaller devices like smartphones, tablets, Nintendo Switch and many other USB-C devices.

Technology	USB-C, Quick Charge
No. of Ports	1x USB-A, 1x USB-C
Output current	Max 1x 2.25 A, Max 1x 3.25 A
Input Voltage	100 - 240 VAC
Max power consumption	65 Watt
Supported Fast charge Technology	PD3.0 65W, QC3.0 18W
Packaging dimensions	140 x 55 x 40 mm

Universal GaN Wall Charger

For laptop, tablet & smartphone

Charge smartphones, tablets, laptops, Nintendo Switch and many other USB-C devices with this Nedis 65W Wall Charger. The GaN technology assures you a stable charging procedure with better heat dissipation and faster charging for multiple devices.

Technology	GaN, USB-C Power Delivery + Quick Charge
No. of Ports	1x USB-A, 2x USB-C
Output current	Max 1x 3.0 A, Max 2x 3.25 A
Input Voltage	100 - 240 VAC
Max power consumption	65 Watt
Supported Fast charge Technology	PD3.0 65W, QC3.0 18W
Packaging dimensions	140 x 80 x 40mm

● WCGPD65W100BK

Universal GaN Wall Charger

For laptop, tablet & smartphone

This Nedis 100 W USB-C PD 3.0 wall charger allows you to power USB-C notebooks. Its advanced Power Delivery technology USB-C PD 3.0 connections allow for faster simultaneous high-speed charging of compatible devices at higher voltages.

Technology	GaN, USB-C Power Delivery
No. of Ports	1x USB-C
Output current	Max 5.0 A
Input Voltage	100 - 240 VAC
Max power consumption	100 Watt
Supported Fast charge Technology	PD3.0 100W
Packaging dimensions	140 x 80 x 40mm

○ WCGPD100W100WT

Universal Wall Charger

with quick charge

Charge smartphones, tablets, Nintendo Switch and many other USB-C devices, without requiring a PC or notebook, with this Nedis 18 W QC 3.0 wall charger.

Technology	Quick Charge
No. of Ports	1x USB-A
Output current	Max 3.0 A
Input Voltage	100 - 240 VAC
Max power consumption	18 Watt
Supported Fast charge Technology	QC3.0 18W
Packaging dimensions	140 x 55 x 30 mm
