ARKFELD PRO

TRIPLE YOUR LIGHTS, TRIPLE YOUR POSSIBILITIES

- BLACK
- ORANGE
- OD GREEN
- RACING STRIPES

The Arkfeld PRO is a portable EDC flashlight that offers three light sources: white light, green laser, and UV. It features a high-performance LED that can reach a maximum brightness of 1300 lumens. With the inclusion of a 520nm green laser module and UV light, this product finds applications across a wide range of uses. Monitoring battery usage is made easy with the intuitive battery indicator. The light's magnetic tail enables easy attachment to metal surfaces, providing convenient illumination wherever it's needed.

The Baton 3 Pro delivers an impressive output of 1,500 lumens. The silicon side switch guarantees effortless operation, offering a comfortable touch with every press. Its customized 3200mAh battery powers the flashlight for a maximum runtime of 120 days. The package includes an L-shaped stand for easy storage, and the clip ensures secure attachment to pockets or backpacks. The updated knurling design enhances grip, making the Baton 3 Pro a top-notch choice for an improved everyday carry flashlight experience.

03

OPTICS

OSIGHT

SEE THE POWER

3 MOA DOT ● RED ● GREEN

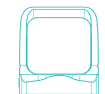

The Osight consists of an optic and a charging cover. This is the industry's first charging cover with a battery level display, allowing you to monitor the battery of both the cover and optic. The cover is USB-C rechargeable, while the optic is recharged magnetically. A fully charged cover can recharge the red dot at least three times. The optic can last over 70,000 hours on its lowest mode, or over 17 days continuously at its brightest setting and over 70 days with the charging cover. With 12 total brightness settings, the clear and crisp 3 MOA dot in the large 0.94 x 0.85-inch window enables target acquisition quickly and accurately. The Osight has been field tested to maintain zero after 10,000 rounds. It offers three modes - manual, lockout, and auto sensing modes. Additionally, the Osight utilizes an industry-standard footprint (Ruggedized Miniature Reflex, 407c/507c footprint) for broad compatibility.

BALDR S / BALDR S BL

POWER AND PRECISION

▲ BALDR S

▲ BALDR S BL

The Baldr S is one of the most powerful compact light/laser combos on the market. It delivers an incredible 800 lumens with a 130-meter beam distance, along with a highly visible green laser (Baldr S BL: Blue Laser) to boost accuracy. Using the mode setting switch, you can choose among white light, green (or blue) beam, and light & laser combo easily without turning it off. The built-in lithium polymer battery is increased to 3.7V 380mAh, ensuring a maximum runtime of 140 minutes. The Baldr S still features the patented sliding rail mount to easily adjust the light to your desired position and includes two types of rail adapters to fit both Glock and Picatinny rails. With the quick installation system, you can attach and release the light in seconds.

LUMENS METERS MINUTES

The Baldr Pro R boasts a white light with a maximum output of 1,350 lumens and a green beam (<5mW) for quick and accurate aiming. The green beam emitter is integrated into the head of the light. This design leaves room for the charging port on the bottom of the light and supports a remote pressure switch. Powered by a 3.6V 1000mAh lithium polymer battery that can be recharged via the magnetic charging cable, this WML runs up to 93 minutes. The selector ring around the head allows you to easily choose among white light only, white light & green beam combo, or green beam only. The Baldr Pro R includes two types of rail adapters to fit both Glock and Picatinny rails. With the quick installation system, you can easily attach and detach the light. The ambidextrous rear switches allow for quick on/off operation or direct access to Strobe.

 60

The PL-MINI 2 Valkyrie is the world's first compact rechargeable weapon light with an adjustable rail which makes it compatible with most pistols, including subcompacts. It delivers a 600-lumen beam that reaches up to 100 meters. The quick attach and release mounting system ensures installation and removal can be completed within one second. The switches can be conveniently manipulated by quick pressing for constant on/off or holding for momentary-on operation. Powered by a built-in lithium polymer battery, the light can be charged through the magnetic charging port located at the bottom.

COMPACT WML WITH ADJUSTABLE SLIDING BLOCK

● BLACK

● DESERT TAN

1,000

200

320

The PL-3S Valkyrie is a compact WML with an adjustable sliding block. It delivers a high output of 1,000 lumens and a low output of 200 lumens, making it ideal for outdoor search, self-defense, and law enforcement. The light comes with two Olight CR123A batteries and is compatible with Panasonic, Sanyo, Energizer CR123A, Duracell 123, and Olight conventional rechargeable RCR123A batteries. It features ambidextrous switches for quick access to momentary-on, constant-on, and strobe modes. Additionally, it includes both Glock and Picatinny rail adapters, providing superb compatibility.

SEE IT ALL, ALL AT ONCE
LIGHT FOR BOTH SHORT AND LONG SET-UPS

- BLACK
- DESERT TAN

 **800** |  **515** |  **66,300** |  **2**

The PL Turbo Valkyrie is a rail-mounted light with a maximum output of 800 lumens and a throw of 515 meters. Powered by two CR123A batteries, it produces a focused beam with ample flood, allowing you to observe both distant and nearby surroundings. Thanks to the patented sliding block, it fits over 100 short and long set-ups with a Picatinny (MIL-STD-1913) rail or GLOCK rail. The secure screw-locking mechanism guarantees extreme stability. The ambidextrous switches provides momentary-on, constant-on or strobe activation. The PL Turbo is an essential lighting tool for outdoor search, self-defense or law enforcement.

SEEKER 4 PRO

THE ULTIMATE EXPERIENCE INSIDE AND OUT

- BLACK
- MIDNIGHT BLUE
- ORANGE
- WHITE
- OD GREEN

The Seeker 4 Pro features an incredible maximum output of 4,600 lumens and a 260-meter beam distance. Its enlarged metal side switch offers better grip and smoother stepless dimming, even with gloves. The flashlight incorporates laser microperforation technology for the first time in the flashlight industry, enhancing indicator visibility while offering a futuristic and elegant appearance. Moreover, this upgraded version comes with an industry-leading innovative holster that offers flashlight auto lock/unlock, USB-C charging, storage, and carrying options. The included 5000mAh rechargeable 21700 battery ensures a maximum runtime of 15 days in Moonlight mode. Cool white and neutral white color temperature versions are available.

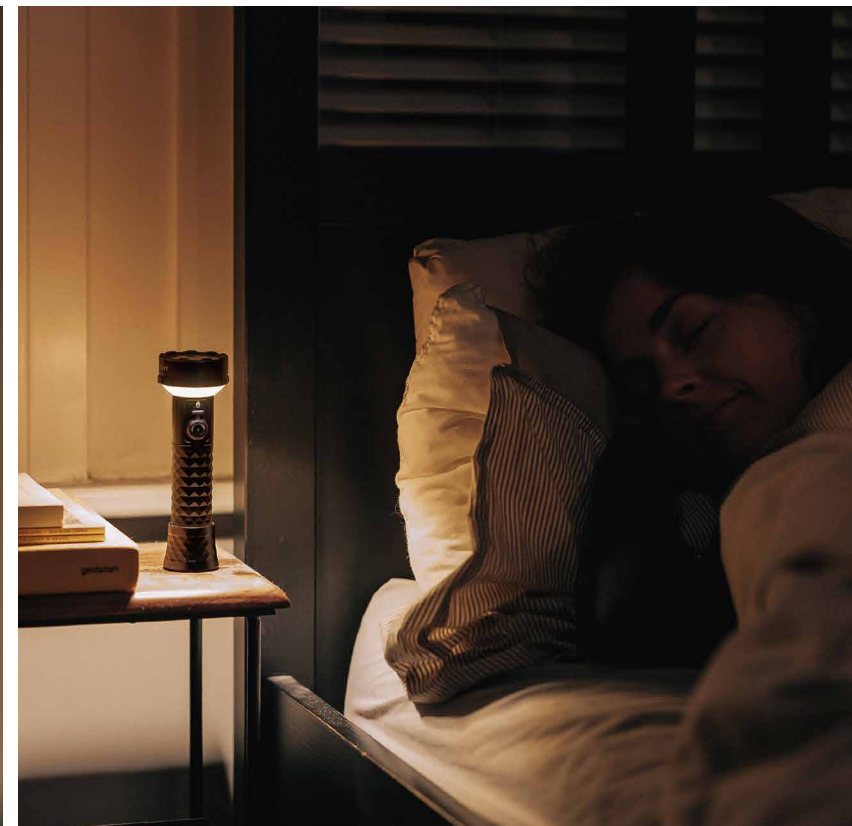

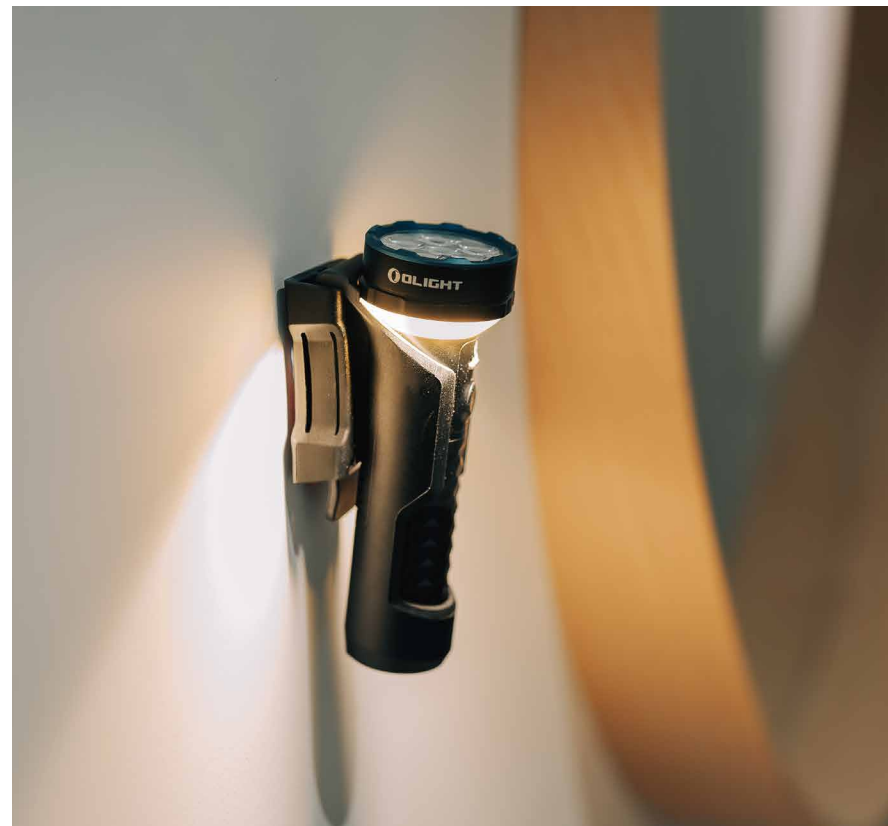

PROWESS

POWERFUL FLASHLIGHT, COZY LAMP

● BLACK

The Prowess incorporates innovative bidirectional lighting. Its forward and reverse lights can be easily switched with a flick of the toggle switch. With its high-performance front light LEDs, it delivers an impressive maximum output of 5,000 lumens and throws a cool white beam up to 245 meters. Meanwhile, the warm white reverse light offers stepless dimming, catering to various lighting needs. Powered by a 5000mAh lithium-ion battery, the Prowess ensures up to 20 days of continuous Moonlight. It supports USB-C charging via the detachable base and magnetic charging with an optional MCC3 cable. The body's diamond-like texture, crafted using the Fermat mathematical formula, not only adds a stunning aesthetic but also ensures a non-slip grip. This versatile light can be used as a handheld flashlight, desk lamp, wall sconce, or camping light, offering convenient illumination options for various settings.

LUMENS **5,000** | METERS **245** | DAYS **20**

The Warrior 3S's LED, paired with a TIR optic lens, delivers up to 2,300 lumens. It features six output settings. For tactical operations, the dual-stage tail switch allows quick and easy access to Turbo and Strobe modes. The proximity sensor proactively reduces the brightness level in case of obstruction. Additionally, its tailcap is compatible with an optional dual-button remote switch for WML applications. Powered by a 5000mAh 21700 battery, it can be easily charged using the MCC3 cable. The Warrior 3S is a do-it-all tactical flashlight that will guide you through any situation.

43.5

The Marauder Mini is a miniature version of Olight's Marauder series. Powered by a customized 24Wh 32650 rechargeable lithium battery, it provides a maximum runtime of 43.5 hours. It offers two powerful beam choices: a 600-meter maximum throw from the central LED's spotlight beam or a 7,000-lumen maximum output floodlight beam from the surrounding LEDs. Three RGB LEDs are evenly distributed around the lens, greatly enhancing its usefulness on any outdoor adventure. It features a toggle switch to select either spot or flood mode, and an intuitive rotary knob switch allowing for quick selection from seven different brightness levels. Smaller in size but still powerful like a beast, the Marauder Mini is a must-have for search & rescue, hunting and other outdoor activities.
